

KEEAN FERREIRA

SOFTWARE DEVELOPER

Pretoria, South Africa (GMT+2) | +27 79 925 8026 | Keeanferreira07@gmail.com | linkedin.com/in/keeanferreira | github.com/Keean07 | [Portfolio](#)

PROFESSIONAL SUMMARY

Software developer with 3 years of professional experience spanning enterprise SAP/ABAP development, full-stack web applications, and independent SaaS product development. BSc in Computer Science (First-Class Honours) from the **University of London** with hands-on experience across the stack — from React/TypeScript front ends to Node.js, PHP, and SAP S/4HANA back ends. Comfortable working remotely and independently, with a track record of shipping production code for large dealership and pharmaceutical clients. Based in South Africa (GMT+2) and looking for remote roles with UK-based teams — full overlap with UK working hours, with no visa sponsorship or relocation required.

SKILLS

Languages	JavaScript, TypeScript, Python, PHP, C++, C#, ABAP
Front-End	React, Vue, SAPUI5 (SAP Fiori), HTML, CSS, p5.js (for fun)
Back-End	Node.js, Express, Laravel, SAP S/4HANA (ABAP)
Databases	MySQL, SQLite, MongoDB, PostgreSQL (Supabase)
Tools & Platforms	Git, Docker, Supabase, Unity, Google Workspace

EXPERIENCE

Software Engineer, BSI-Auto Inc.

Jan 2026 – Present · Remote

Software provider for automotive service centre operations across dealership networks including Ford, Mahindra, and Jaguar Land Rover.

- Work within large, legacy codebases, focusing on optimisation and refactoring of business-critical systems.
- Deliver new features and products used directly in Ford's service centre operations.

Software Developer, Lark & Stern Consulting Inc.

Oct 2023 – Jan 2026

Enterprise consulting for pharmaceutical-sector clients including AstraZeneca, Thermo Fisher Scientific, and Bristol Myers Squibb.

- Joined as an independent consultant following graduation, later converting to a full-time role.
- Built front-end applications in SAPUI5 for SAP Fiori and contributed to back-end development on SAP S/4HANA using ABAP.
- Led AI-driven research projects focused on data management and process improvement.

PERSONAL PROJECTS

RealtyGenie, Independent — Full-Stack SaaS (<https://www.realty-genie.co.za>)

Ongoing

A SaaS platform for South African real estate agencies, covering agency documentation, agent records, listing management, and audit preparedness.

- Architected and built the platform end-to-end using React/TypeScript, Node.js/Express, MongoDB, and then Supabase (PostgreSQL).
- Integrated PayFast payment processing into a multi-step subscription and registration flow.
- Implemented role-based reporting and analytics capabilities, a secure backend system, and a visually appealing and intuitive frontend.
- Authored a documentation hub, allowing seamless alignment on what is there, what's expired, and what's missing.
- Authored a full legal and compliance documentation suite (Terms & Conditions, Privacy Notice, Data Processing Agreement) aligned with South Africa's POPIA.

EDUCATION

BSc Computer Science, First-Class Honours, University of London

2023

Modules included Graphical Programming, Data Science, Database Development, and Web Development.

Essentials of Cybersecurity, edX

2023

Covered cybersecurity implementation across private, public, and military sectors.
